Eagle-Grip® Powered Drum Dumper Lift Truck Attachment

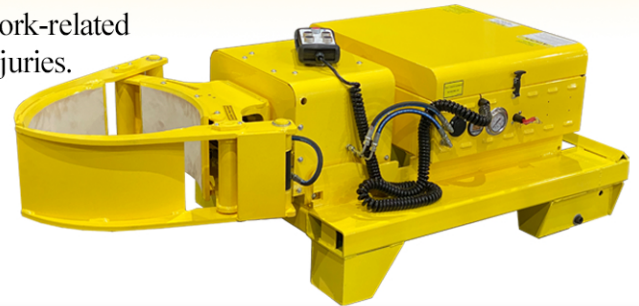

FEATURES

- Remotely lift, clamp and rotate drums without having to dismount the lift truck.
- Handle 18- to 28-inch (45 to 71 cm.) diameter steel, plastic or fiber drums.
- Clamp Rotates 360-degrees endlessly either left or right.
- Clamping pads are comprised of non-marking SBR rubber to provide a durable yet secure grip.
- 2,000 lb. (907 kg.) lifting capacity.
- Powered by two 12-volt AGM deep cycle batteries.
- Quick-Claw option is also available, which eliminates the need for a safety chain.

QUICK-CLAW™ SAFETY RESTRAINT SYSTEM

The Quick-Claw option is also available, which eliminates the need for a safety chain. The cam locks of the Quick-Claw prevent the attachment from sliding off the forks, even when making abrupt stops with a fully loaded drum. This safety feature helps prevent accidents and work-related injuries.

The **Powered Drum Dumper Lift Truck Attachment** allows the operator to remotely manipulate drums from most lift trucks without the need for additional equipment or having to dismount the lift truck while clamping, lifting and rotating a drum. It offers the ability to clamp and rotate 18- to 28-inch (45 to 71 cm) diameter steel, plastic or fiber drums 360 degrees endlessly either left or right. The clamping pads are comprised of SBR rubber to provide a durable yet secure non marking surface to grip the drum. The maximum lifting capacity of this attachment is 2000 lbs, however the actual capacity and lift height may be limited by the specifications of your lift truck. This Eagle-Grip Attachment includes two 12-volt AGM deep cycle batteries which are housed in a closable cabinet. The Quick-Claw option is also available, which eliminates the need for a safety chain.

The **Remote Control Box** has a magnetic back, which allows the operator to mount the control box in a convenient location within the lift truck cab. It is recommended to place the control box in a location that can easily reached by the operator.
